Abstracts

The Latin America, Middle East and Africa Pyrometer Market would witness market growth of 8.8% CAGR during the forecast period (2017 – 2023). It is now observed that most of the processes and systems within the manufacturing sector are automated, and accurate temperature measurement with pyrometer is one such process. Growing trend of automation in industries and need for robust temperature-measuring devices in industries such as glass, forging, and ceramics, drive the growth of the pyrometer market. The devices used in the aforementioned industries must be efficient and robust even in harsh environments, and pyrometer proves very helpful in all weather conditions. Varying emissivity of an object or surface is limiting the growth of the pyrometer market.

Based on End Use Industry, the market report segments the market into Metal Processing, Ceramics Industry, and Glass Industry. Based on Technology, the market report segments the market into Optical and Infrared. Based on Type, the market report segments the market into Handheld and Fixed.
