## Abstracts

The Latin America, Middle East and Africa Rice Bran Oil Market would witness market growth of 5.5% CAGR during the forecast period (2020-2026).

Rice Bran Oil provides a mixture of monounsaturated, polyunsaturated, and saturated fats. It's also considered a heart-friendly oil that can help improve cholesterol. Rice bran oil is recommended by the American Heart Association and The World Health Organization (WHO) as the best choice to improve serum cholesterol levels. Rice bran oil is naturally trans-fat-free and is fast becoming a favourite in commercial frying to replace hydrogenated oils containing trans-fat.

Many of today's oils are partly hydrogenated (banned by the FDA after 2018) and consumers are actively seeking alternatives. Together with High Oleic Non-GMO Canola Fry Oil and High Oleic Sunflower Fry Oil, it makes a great frying option with its high smoke point and a mild taste. Rice bran oil includes a complex of vitamin E, antioxidants, and other micronutrients that help suppress free radicals and reverse the symptoms of aging. It's these rice bran oil components that also give it outstanding shelf life. It is also a common source of antioxidants including tocopherols, tocotrienols, gamma oryzanol, phytosterols, polyphenols, and squalene.
