The Latin America, Middle East and Africa Road Safety Market size is expected to grow at a market growth of 13.3% CAGR during the forecast period. Road safety involves products and services introduced to prevent or in the least cases reduce risk of accidents, maintain traffic discipline, control and curb wayward vehicular movement and ensure safety of commuters. Rapid urbanization, growth in mobility and need for transportation systems, stringent government regulations pertaining to road safety and growing road accidents are the factors driving the growth of the market. On the other hand, insufficient government funding, challenges in the implementation of advanced road safety infrastructure, overly growing number of vehicles would limit the growth of the road safety market.
