Abstracts

The Latin America, Middle East and Africa Specialty Lighting Market would witness market growth of 11% CAGR during the forecast period (2020-2026).

To ensure germ-free surfaces, water or air, microorganisms need to be inactivated within seconds and reliably. This can be done simply with intensive UV lamps and systems. During numerous processes, UV light disinfection and germ reduction are used in industrial applications. The number of germs and bacteria in the air is consistently decreased to improve hygiene and storage conditions, and the surfaces of packaging are disinfected to increase the shelf-life of products. Ultraviolet light disinfection is an environmental and economic solution to prevalent chemical processes. Intensive bactericidal effect is caused by short-wave UVC radiation, which makes virus, bacteria, yeasts and fungi harmless in seconds. In addition, UV radiation resistance cannot be achieved by microorganisms.

The specialty lighting market in the LAMEA region is growing gradually and has great potential in the lighting sector and the municipal lighting sector. Africa faces low-end lighting applications, which means that it does not require high-quality LED lights but is more likely to accept low-cost, long-lasting, durable, basic lighting functions, 3-year maintenance-free, easy-to-operate LED lights on the market.

In addition, the African market is particularly interested in autonomous solar lighting solutions to illuminate remote areas without grid access. Other than this, as per the Brazilian legislation, LED lighting products should have Inmetro certification requirements for certification bodies to be accredited local institutions Brazil LED bulb and lamp standard is actually the International Electrotechnical Commission (IEC) and the US Energy Star standard assembly, i.e. to meet the safety requirements of the

European standard.

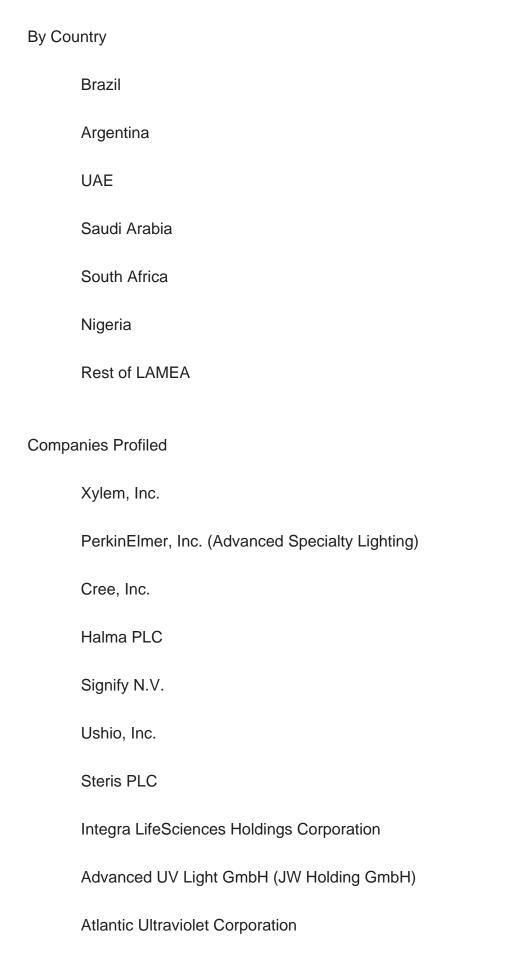

Based on Light Type, the market is segmented into LED and Others. Based on Application, the market is segmented into Entertainment, Medical, Purification and Others. Medical segment is further bifurcated into Surgical Lighting and Examination. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.

The market research report covers the analysis of key stake holders of the market. Key companies profiled in the report include Xylem, Inc., PerkinElmer, Inc. (Advanced Specialty Lighting), Cree, Inc., Halma PLC, Signify N.V., Ushio, Inc., Steris PLC, Integra LifeSciences Holdings Corporation, Advanced UV Light GmbH (JW Holding GmbH), and Atlantic Ultraviolet Corporation.
