The Latin America, Middle East and Africa Structured Cabling Market would witness market growth of 9% CAGR during the forecast period (2017 – 2023). With the increasing need for high-speed networks, the networking system is partitioned into smaller parts, with shorter cable lengths, which supports high data speed. Implementation of LAN enables faster data transmission, as the data is fragmented into smaller chunks. The data center segment would grow at a higher CAGR during the forecast period, due to growing adoption of IoT devices, mobile data, and smart applications. Large amount of data is generated from various digital devices, demanding more storage space, therefore, driving the demand for data centers, which further add to the demand for high data transmission speed. Therefore, demand for structured cabling systems is anticipated to grow over the forecast period.
