## **Abstracts**

The Latin America, Middle East and Africa Superfoods Market would witness market growth of 8.3% CAGR during the forecast period (2020-2026).

The health benefits of superfoods increase their importance among end-users.

Superfruits are rich in fibers, vitamins, antioxidants, polyphenols and minerals that help metabolism, strengthen the immune system, muscles and bones, and protect the body from wear and tear. The increasing understanding of safety and the need to lead a healthy lifestyle are also adding to the rising market for superfoods.

Manufacturers deliver superfoods in a range of ways, from powders, snacks, mixes and shots, to meet this demand. In addition to the demand for superfoods from the beauty and personal care markets, the nutritional advantages of superfoods would also fuel consumer growth. As a result, the global demand for superfoods will rise at the highest CAGR during the forecast period.

Superfood is a marketing term for products alleged to carry health benefits derived from exceptional nutrient density. The term is not widely used by professionals, dietitians and medical scientists, all of whom argue that particular foods have health benefits claimed by their advocates. Even without empirical proof of extraordinary nutrient value, many fresh, exotic and global fruits or "new" grains are sold under the name – or word, superfruit or super grain – after being imported or reintroduced to Western markets.

Based on Type, the market is segmented into Fruits, Herbs & Roots, Grains & Cereals, Vegetables and Other types.

Based on Application, the market is segmented into Bakery & Confectionery, Snacks, Beverages and Other Applications. Based on countries, the market is segmented into

Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
