Abstracts

The Latin America, Middle East and Africa Telepsychiatry Market would witness market growth of 20.3% CAGR during the forecast period (2020-2026).

The time and cost of traveling are saved by the application of Telepsychiatry as it ensures that neither the psychiatrist nor their patient needs to travel a long distance in order to get treatment. All that is required for consultation is any accessible device like smartphones, laptops, etc. along with an Internet connection. The telepsychiatry market is helpful for psychiatrists also as they can go for a quick second opinion. Psychiatrists also get benefitted by Telepsychiatry to begin the treatment quickly on the other hand their diagnosis can be validated and assured that the doctor's diagnoses are correct. The rapid improvement in the mobile network infrastructure enables both doctors and patients to get clinical access even in small villages and semi-urban areas. This minimizes the need to visit long-distance and saves time and money for both parties. There is a lack of trained medical professionals as well as awareness among people. Therefore, severe issues of mental health may also be ignored or suppressed. Patients are preferring to get more engaged with telehealth for managing their needs of healthcare. On the basis of lifestyle habits and prior medical history, a patient's healthcare needs can be assessed by AI programs and chatbots that help them to

remain engaged with the healthcare system. The tools like Automatic appointment reminders, remote physician consultations and, stress-free in-app scheduling tools are helpful for the patients to keep up their healthcare needs.
