Abstracts

The Latin America, Middle East and Africa Tumor Ablation Market would witness market growth of 13.2% CAGR during the forecast period (2019-2025).

The ablation market for tumors in the Middle East & Africa is fueled by factors such as the growing aging population and the increased number of people suffering from cancer. An increase in the demand for minimally invasive cancer treatment procedures and high awareness of the benefits that ablation procedures offer over conventional surgical procedures are also among the key factors that add up to market growth.

Microwave tumor ablation technology has been the fastest-growing category of ablation technology currently used to manage various cancers (like lung, liver, and kidney). Growth in the microwave ablation segment can be attributed to increased private funding for new microwave ablation product development, drastic efficiency over other ablation technologies, and increased adoption by Healthcare professionals of the microwave tumor ablation procedure to treat different cancers.

The percutaneous ablation techniques are well known in cancer treatment for both cure

and local regulation of many forms of tumors. Tumor tissue cryoablation leads to cell destruction by freezing. Cryoablation leads to tumor cell death by osmosis and necrosis, in comparison to heat-based ablative modalities. It is observed that the intracellular contents of cancer cells remain intact with necrosis allowing an immune-specific reaction to being induced by the immune system.

Based on Treatment, the market is segmented into Surgical Ablation, Laparoscopic Ablation and Percutaneous Ablation. Based on Technology, the market is segmented into Radiofrequency Ablation, Microwave Ablation, Cryoablation, Irreversible Electroporation and Other Technology. Based on Application, the market is segmented into Liver Cancer, Breast Cancer, Lung Cancer, Kidney Cancer, Prostate Cancer and Other Cancer. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
