Abstracts

The Latin America, Middle East and Africa Urinary Drainage Bags Market would witness market growth of 6.7% CAGR during the forecast period (2020-2026).

The major factor which is fuelling the growth of the market for disposable urine drainage bags includes the increasing prevalence of colorectal, bladder, and urinary tract cancers, which causes urinary incontinence and retention. In addition to it, an increase in the geriatric population that is suffering from chronic ailments, like Alzheimer's diseases, paralysis, and another chronic disease will supplement the market growth. Though, medical issues are also arising due to the use of catheters and dearth of awareness about the disposable urine drainage bags that hinder the market growth.

Furthermore, many risks are associated with the use of capillary blood collection techniques as well as the challenges faced at the time of micro-collection obstruct the growth of the market. An increase in preference for disposable urine drainage bags over reusable bags is likely to offer profitable opportunities for the growth of this market. This is accredited to the fact that using disposable urine drainage bags reduces the risk of urinary tract infections that are caused due to inadequate cleaning of the bags. Furthermore, technological advancements and product innovation in the capillary blood collection tubes are expected to offer growth opportunities for the growth and expansion of the market.

Based on Product, the market is segmented into Leg Bags and Large Bags. Based on Capacity, the market is segmented into 500-1000 ml, 0-500 ml and 1000-2000 ml. Based on Usage, the market is segmented into Reusable and Disposable. Based on End-use, the market is segmented into Clinics, Hospitals and Other End Uses. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
