## Abstracts

Virtual training is a simulated virtual environment which is created to assess the capabilities of trainees to select the right resource. The virtual training simulation is of two kinds, namely instructor-led training and non-instructor-supported training. Simulation, by definition is a process of imitation of an operation of a real world system or a process. The simulators are widely used in different applications such as flight simulation, simulation-based gaming, serious games, healthcare training, energy, transportation training, e-learning, military & navy, digital manufacturing, and others. Simulation technology finds its applicable in aviation, military, medical science, and navy. The levels of awareness would eventually rise and the adoption of the technology would witness significant rise among different end users.

The LAMEA virtual training and simulation market is segmented based on components, end user, and country. The components segment is further sub-segmented into hardware and software. Based on end users, the market is segmented into defense & security, civil aviation, education, entertainment, and others. The education segment is further bifurcated into e-learning and game-based learning.

Based on Country, LAMEA Virtual Training and Simulation market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria and Rest of LAMEA.
