## Abstracts

The Latin America, Middle East and Africa Air Quality Monitoring System Market would witness market growth of 8.9% CAGR during the forecast period (2019-2025).

Air pollution poses a major threat to the balance of the environment. It has a significant influence on the environment, contributing, among others, to acid rain, elevated levels of toxicity, and global warming. Increasing demand for protection in the work environment leads to increased adoption of air quality monitoring systems in industries such as construction, automotive, and oil and gas. Growing automobile sales in these countries have resulted in air pollution as a result of increased vehicle emissions. To efficiently monitor and control air pollution, the implementation of air quality monitors has increased in both homes and industries. Supportive government regulations and increased public-private cooperation to reduce air pollution rates have driven the growth of the sector.

As a result of the increase in the number of vehicles and rising industrialization, there has been a significant increase in emissions released into the atmosphere. Governments and environmental authorities have introduced strict exhaust emission laws and regulations in response. The use of IoT-based Air Quality Monitoring Systems (AQMS) wireless communication networks is expected to be the future. The market for air quality monitoring has seen steady growth due to increased levels of air pollution and increased awareness of health issues caused by polluted air. Rapid industrialization has led to increased levels of toxic pollutants such as carbon dioxide, sulphur dioxide, carbon monoxide, and volatile organic compounds in the atmosphere in developing countries Brazil.

Based on Pollutant Type, the market is segmented into Chemical and Physical.

Chemical Pollutants segment is further bifurcated into Carbon Oxides, Sulphur Oxides, Nitrogen Oxides, Volatile Organic Compounds and Others. Based on Component, the market is segmented into Hardware, Software and Services. Based on Product Type, the market is segmented into Outdoor and Indoor. Based on End User, the market is segmented into Industrial, Commercial and Residential.
