The Latin America, Middle East and Africa Commercial Refrigeration Equipment Market would witness market growth of 7.9% CAGR during the forecast period (2019–2025).

The commercial refrigeration equipment market is growing because of an increase in investments in the food and beverage industry. Considering the growing population, the players of the food and beverage industry have increased the production to meet with the continuously growing demand. For example, the growing demand for the meat and meat related products which are perishable is pushing the demand for refrigeration systems in the predicted time span. Increased demand for bakery products, frozen food, and packaged food products drives the demand for commercial refrigeration equipment. Furthermore, to decrease carbon footprints, the manufacturers have focused on developing commercial refrigeration equipment that ingests the less or inadequate amount of energy.

Increase in industrialization and urbanization led to the development of organized hypermarkets, food retail chains, and supermarkets in emerging economies. Furthermore, the growth in the Food & Beverages (F&B) sector of these countries has provided a boost to the commercial refrigeration equipment market.
