## Abstracts

The Digital Asset Management (DAM) Market in Latin America, Middle East and Africa is expected to register a CAGR of 17.7% during the forecast period (2017 – 2023). Software solutions have the potential to simplify tasks and accordingly maximize the value of the assets in question. A Digital Asset Management (DAM) system is designed to provide a centralized repository which allows quick and easy ways to upload, catalog, manage and distribute large sets of valuable assets. DAM is a system which is used to organize, categorize, search, retrieve and archive digital files effectively. The digitally created files are considered as assets, as significant amount of time, money and efforts go into the creation of content. These assets become invaluable when they are used optimally, and as and when required by different stakeholders. Digital Asset Management software can be of great help to the organizations in significantly improving the efficiency of the process and as a result would save time and money.

Based on the component type, the Digital Asset Management System market is segmented into Solution and Services. The Services market is segmented into Professional and Managed Services. Professional services are further segmented into Implementation, Consulting & Training and Support & Maintenance. Based on the Organization Size, the market is segmented into Small & Medium enterprises and Large Enterprises. The Applications highlighted in this report include Enterprise, Marketing and Others.
