Abstracts

Electric wheelchair is used preferably by the people who are not able to walk due to physical disability or illness. It is also used by the people suffering from any type of cardiovascular or fatigue based conditions. Electric wheelchair consists of three main wheels, Rear, Front, and mid wheel Drive. Seating & positioning, cushions & brackets like features are also contributing to the growth of the electric wheelchair market.

The electric wheelchair has witness the prominent growth in the recent years. New innovations have been coming in the market. National Polytechnic Institute (IPN) has come up with new versions of the solar electric wheelchair. The device has three retractable solar cells that could charge three batteries per day. In addition to this, the product could carry up to 160kg with 15 kilometers per hour of speed and it is very light and durable seat. The product is expected to launch in coming months. However, it has already gained attention of consumers.

Recently, Air wheel launched new smart power wheelchair and helmets at Hong Kong Electronics Fair. Air wheel R series has three more rides mode and riding styles could also be altered in the same. The product can be quickly charged and also manageable with 214.6Wh in about 180min. The product is expected to give tough competition to other market competitors.
