Abstracts

The Latin America, Middle East and Africa Motion Sensors Market would witness market growth of 8.9% CAGR during the forecast period (2019–2025).

The growing application of motion detectors in smartphones and tablets along with the growth in demand for these detectors in virtual gaming & entertainment, automotive, and healthcare industries are the factors driving the market growth. The motion-controlled video games are also using these detectors to sense movements. Motion sensors are being incorporated into various automobile applications ranging from advanced driver assistance systems (ADAS), airbag deployment systems, and security.

Infrared sensors are majorly used as components of systems that automatically alert a user for the system which is being used. Nevertheless, the demand for microwave sensors is estimated to rise at the highest rate over the forecast period. This growth can be attributed to the growing adoption of these sensors in security and surveillance. Microwave motion sensors release microwaves and detect interruptions by analyzing the frequency of the received microwaves after the reflection of any intruder.

Base on Technology, the market is segmented into Infrared, Ultrasonic, Microwave, Dual Technology and Others. Based on End User, the market is segmented into Consumer Electronics, Aerospace & Defense, Healthcare, Automotive, Industrial and Others.
