## Abstracts

The Latin America, Middle East and Africa Oculoplastic Surgery Market would witness market growth of 6.74% CAGR during the forecast period (2019-2025).

Plastic surgery is no longer a taboo to discuss in the Middle East and has become prevalent in many parts of the region, with the trend becoming largely inclusive of men seeking to defy the aging process. At the moment, chin or submental liposuction, blepharoplasty or eyelid surgery for fatty bags and facelifts are the main surgical procedures for patients. The increased demand for plastic surgery among teenagers and university students is being described as a key contributor to the emergence of the UAE's cosmetic surgery industry.

Ocular plastic surgery is a generic term used in surgical procedures done around the eyelid, orbit and/or face. Consumer awareness and a surge in the geriatric population vulnerable to signs of aging are key factors driving growth. The demand is also driven by the emergence of safer and less invasive procedures due to rapid technological advances. In addition, a growing urban population, the availability of numerous surgical procedures and an increasing number of plastic surgeons around the globe are also expected to fuel market growth.

Based on Procedure, the market is segmented into Eyelid Surgery, Orbital Surgery, Face Lift, Brow Lift & Forehead Lift and Pediatric Oculoplastic surgery. Based on End Use, the market is segmented into Ambulatory surgical centers and Hospitals & clinics. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
