Abstracts

The Latin America, Middle East and Africa Patient Portal Market would witness market growth of 18.3% CAGR during the forecast period (2019-2025).

A patient portal is a web-based access point that is linked to Electronic Health Records (EHR) systems or access points that are designed to facilitate patient access to health records. Over the portal, patients can also share and communicate their health information remotely. They allow patients to analyze various data points, including reports from physicians, tests from the study, their health history, and reviews of discharge for immunizations.

Some portals allow patients to review information on medical history and view demographics. Based on the system providers and the healthcare facility, patients can also review real-time results and updates the patient portal. A portal can help ease some of the front office staff's responsibilities while enabling patients to track their records online. Several patients have prompt access to every kind of service. For such patients, a portal can help to access records, directly send messages to their doctor schedule and confirm appointments, and make the payments of outstanding balances. Patients can schedule doctor appointments online and even refill their prescriptions through the patient portal.

Based on Type, the market is segmented into Integrated and Standalone. Based on End Use, the market is segmented into Providers, Payers and Others.
