Abstracts

The Latin America, Middle East and Africa Pest Control Market would witness market growth of 6.1% CAGR during the forecast period (2019-2025).

Pests are found in the form of rodents, birds, insects, and other organisms within homes and urban environments. These pests share the habitat with humans, feed on, and spoil possessions. Pest control becomes extremely necessary in such scenarios and is done through exclusion, physical removal, repulsion, or chemical means. As an alternative, several methods of biological control like sterilization programmes are being used.

Market growth is driven by its growing demand from agricultural nations. Furthermore, climate change across the globe is also an important factor in the rise in prices for pest control products and services because climate change attributes an increase in temperature, whereas elevated temperature is an optimal situation for an increase in the pest population. However, rising concerns about pesticide toxicity concentrations and the resulting health problems that occur owing to overuse of toxic pesticides hamper the development of the pest control market to some extent.

Based on Type, the market is segmented into Chemical Based, Mechanical Based, Biological Based and Other Types. Based on Pest Type, the market is segmented into Insects, Termites, Rodents and Other Pests. Based on Application, the market is segmented into Commercial, Residential, Agriculture, Industrial and Other Applications. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
