The Latin America, Middle East and Africa Power MOSFET Market would witness market growth of 10.7% CAGR during the forecast period (2017 – 2023). MOSFET is a form of power semiconductor which is used as an electronic switch device. MOSFET is a cost-effective solution and a perfect replacement for bipolar junction transistor (BJT). These electronic switch devices enable power management which in turn helps in energy conservation in various applications such as industrial systems, consumer electronics, and electric vehicles. The need for compact automation solutions, superior efficiency levels, and durability are the factors that have contributed to the adoption of power MOSFET in consumer electronics, energy & power, and other applications. However, high implementation cost and undesirable leakage current are the factors that hamper the market growth.

Based on Power Rates, the market report segments the market into Low Power, Medium Power, and High-Power. Based on Types, the Latin America, Middle East and Africa Power MOSFET market is segmented into Depletion Mode and Enhancement Mode Enterprises. Based on Applications, the Power MOSFET market is segmented into Consumer Electronics, Energy & Power, Automotive, Inverter & UPS, and Others. Based on Countries, the market report segments the market into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
