Abstracts

The Latin America, Middle East and Africa Security as a Service Market would witness market growth of 20.4% CAGR during the forecast period (2018 – 2024).

Cloud - based models are now being used by organizations to adopt safety services and solutions. This shift has taken place for a number of reasons. With cloud-based security companies can eliminate the cost and difficulty of supplying, managing and scaling security software, quickly and consistently delivering the latest security technologies and updates, helping companies to remain compliant and reduce risks eventually.

Telecom companies offer more affordable, agile and enhanced services by clicking on the cloud model available on the Internet on demand. However more reliance on the cloud is a double-edged sword, given that the threats to hackers and cyber attackers posed by cloud computing are huge. It is highly likely that telecom companies will possess personal information about individuals such as names, addresses and credit card numbers, which will lead to identity theft and financial loss when hacked.
