## Abstracts

The Latin America, Middle East and Africa Thermal Paper Market would witness market growth of 12.5% CAGR during the forecast period (2019-2025).

Thermal paper is a type of special paper used for digital printing and copying. Unlike traditional paper packaging options, environmentally friendly paper packaging solutions including BPA free thermal paper have come into use in recent years. BPA-free thermal paper is a specialty paper containing a chemical that changes color when exposed to heat. BPA-Free Thermal Paper Products offers a variety of solutions for POS systems, cash registers, and hand held instruments used across the gaming, financial, medical, hospitality, and government industries.

As it provides moisture resistance, barcode scan ability, and high temperature stability, thermal paper has always been widely used in POS terminals. In addition, the market is expected to be fuelled by exceptional features of thermal paper such as durability compared to traditional printed paper and expansion of POS terminals. The market growth can be attributed to the rising market for POS terminals and high demand for labels. In addition, rising food and beverage industries are expected to fuel demand in developing economies like the Middle East. It is also expected that the emergence of new supermarkets and hypermarkets and the growing use of thermal paper in cash registers, bill receipts and ATM rolls would increase the demand for the product.

Based on Technology, the market is segmented into Direct Thermal, Thermal Transfer and Others. Based on Application, the market is segmented into Point-of-Sales, Tags & Labels, Gaming & Lottery and Others. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
