Abstracts

The Latin America, Middle East and Africa Wood Coatings Market would witness market growth of 6.8% CAGR during the forecast period (2019–2025).

These coatings safeguard wooden surfaces from damping and make their appearance clearer and richer. These coatings are distinct from painting in a way that covers the initial wooden surface while wood coatings enhance the surface appearance. The word coating can also depict several finish coats or a complete coating build-up. It is highly recommended to finish a wooden surface whether it is a new or an item of old furniture. The coating is completed by adding a liquid to the wood surface. Thus, wood coating produces a wood material that looks like dashing and provides a protective layer.

Oil wood coatings enhance the appearance of an unfurnished wood. Oils coatings substitute the natural oils and nourish the grain of the wood and protect well the wood for inner and external use. Varnishes are produced of petroleum, solvents, and resins and are mostly of a clear and transparent texture. They offer better protection against UV. Thus, applying the varnish to the top of the dye provides better coverage.

Based on Resin Type, the market is segmented into Polyurethane, Acrylic, Nitrocellulose, Unsaturated Polyester and Others. Based on Technology, the market is segmented into Waterborne, Conventional Solid Solvent Borne, High Solid Solvent Borne, Powder Coating, Radiation Cured and Others. Based on End Use, the market is segmented into Furniture, Joinery, Flooring and Others.
