The North America Air Quality Monitoring System Market would witness market growth of 5.9% CAGR during the forecast period (2019-2025).

A large number of affiliations between government agencies and private organizations have been seen in recent years. Large companies including Honeywell International Inc. and Intel Corporation are working together to protect the environment through government agencies around the globe. The purpose of these partnerships is to develop sensor networks and smart systems to monitor air and water quality. Under the Clean Air Act, the Metropolitan Washington Council of Governments in collaboration with Maryland Department of Transportation, Baltimore Metropolitan Council, and WGL Holdings, Inc. formed the Clean Air Partners. Clean Air Partners has installed monitoring systems throughout the Baltimore-Washington region, providing the area's current and predicted air quality information.

Due to increased awareness of the health and environmental effects of particulate matter, the physical pollutant segment in the air quality monitoring system market is projected to display the fastest growth rate during the forecast period. A particulate matter of less than 10 micrometers can cause cardiac morbidity in both the elderly and children under the age of 10. In response to the health problems associated with particulate matter, government agencies like the Canadian Council of Environment Ministers have developed guidelines for manufacturing industries on particulate matter emissions.

Based on Pollutant Type, the market is segmented into Chemical and Physical. Chemical Pollutants segment is further bifurcated into Carbon Oxides, Sulphur Oxides, Nitrogen Oxides, Volatile Organic Compounds and Others. Based on Component, the
