Abstracts

The North America Airway Clearance System Market would witness market growth of 4% CAGR during the forecast period (2019-2025).

As part of their normal airway clearing routine, many people with cystic fibrosis (CF), bronchiectasis (BE) and other respiratory disorders use high-frequency chest wall oscillation (HFCWO) vests. High-frequency chest wall oscillation (HFCWO) is an airway clearing technique that uses a modified vest to administer external chest wall oscillations to the torso. These vests create vibrations at varying frequencies and intensities to help release and thin mucus and remove it from the walls of the airway in order to cough it up.

It is important to consider the complexities of chronic lung disease such as bronchiectasis in order to determine the appropriate treatment strategy for your particular symptoms. Bronchiectasis is a permanent lung disease that can damage the

airways and impair the capacity to clear mucus, from shortness of breath to a chronic cough that produces mucus. Clearing mucus from the lungs using a combination of medicine and airway clearing procedures will enhance symptoms for patients living with bronchiectasis and reduce risks of impaired airway clearing.

Improvement in healthcare policies in different countries, such as the U.S., has increased the affordability for various medical and treatment facilities, which in effect has improved people's life expectancy. The burgeoning aging population would boost the number of people diagnosed with asthma and COPD. The overall treatment of asthma and COPD after age 65 is highly crucial and troublesome. People over 65 who have been diagnosed with asthma and COPD cannot take liquid medication.

Based on Type, the market is segmented into Positive Expiratory Pressure (PEP), Mechanical Cough Assist, High Frequency Chest Wall Oscillation (HFCWO), Oscillating PEP devices and Intrapulmonary Percussive Ventilators. Based on Application, the market is segmented into Cystic Fibrosis, Neuromuscular, Bronchiectasis, Emphysema and Other Applications. Based on End Use, the market is segmented into Home Care Settings, Ambulatory Surgical Centers, Hospitals & Clinics and Other End Use. Based on countries, the market is segmented into U.S., Mexico, Canada, and Rest of North America.
