Abstracts

The North America Ambulance Services Market would witness market growth of 4.2% CAGR during the forecast period (2019-2025).

Air Ambulance services are concerned with providing urgent healthcare services. The Air Ambulance is used mainly for rapid transfer of patients to healthcare facilities. Shifting patients by airplane or helicopter during medical emergencies has helped so many people access emergency care on time. Air ambulances are not only used in some cases for transporting patients, but this service is often used to move emergency equipment from one location to another.

No matter how developed a region is, due to lack of roads and other routes, there are many remote areas which are very difficult to reach. Regions that are largely surrounded by water sources or rough terrain typically have difficult roads and alternative transportation can be easily obtained. Ambulance boats or water ambulances are built specifically to deliver the most appropriate emergency care to places that are typically unfortunate enough to be isolated. These are also designed to go faster than regular boats so that these enter the affected area faster.

Advanced Life Support (ALS) is a series of life-saving procedures and skills that expand

Basic Life Support to further assist circulation and include an open airway and adequate ventilation (breathing). ALS's key algorithm, which is invoked when actual cardiac arrest is identified, depends on monitoring of the heart's electrical activity on a heart monitor. Defibrillation is applied, and medication is provided, depending on the form of cardiac arrhythmia. Oxygen is given, and endotracheal intubation may be tried to protect the lungs. The treatment's effect on heart rhythm, as well as the existence of cardiac output, is periodically assessed.

Based on Transport Type, the market is segmented into Ground Ambulance Services, Air Ambulance Services and Water Ambulance Services. Based on Urgency, the market is segmented into Emergency Ambulance Services and Non-Emergency Ambulance Services. Based on Equipment, the market is segmented into Advance Life Support and Basic Life Support. Based on countries, the market is segmented into U.S., Mexico, Canada, and Rest of North America.
