Abstracts

The North America Application Gateway Market would witness market growth of 9.2% CAGR during the forecast period (2019-2025).

Application gateways provide safe network communication at high levels. In a server access request for documents, web pages, and databases, for instance, a client first connects to the proxy server and then links it to the main server. The application gateway is located on the firewall client and server. The proxy server displays IP and other secure information on behalf of the client. An internal computer system can interact with an external computer using firewall protection. The application gateway and external devices work without customer information or proxy server IP address knowledge.

North America is the largest cyber security market due to the increasing incidents of data breaches and threats to security. The region has the base for world's largest security providers. The IoT has transformed the cyber security landscape. With IoT enabling organizations, data security has become a major problem through large networks. New types of cyber-attacks are coming to the risk environment with the growing amount of connected devices.

Based on Component, the market is segmented into Solution and Services. Services segment is further bifurcated into Integration & Deployment, Advisory & Consulting and Support & Maintenance. Based on Organization Size, the market is segmented into Large Enterprises and Small & Medium-Sized Enterprises. Based on End User, the market is segmented into BFSI, Retail, Manufacturing, Government & Public Sector, Healthcare, Telecom & IT and Others.
