Abstracts

The North America Bio-Based Polymers Market would witness market growth of 6.5% CAGR during the forecast period (2019-2025).

Bio-based polymers are closest to the concept of replacing mainstream polymers. Today, bio-based polymers are frequently found in numerous applications in biotechnology and public awareness from commodity to hi-tech applications. Despite these improvements, however, there are still some disadvantages which in many applications discourage a further introduction of bio-based polymers. This is primarily because of the quality and cost of bio-based materials relative to their standard components.

As a consequence of increased demand for green chemicals worldwide, the bio-based polymer industry is anticipated to expand substantially during the forecast period. Furthermore, factor such as rigorous regulatory policies on synthetic polymers usage fuels the progress of the bio-based polymer industry.
