Abstracts

The North America Cephalosporin Drugs Market would witness market growth of 4.69% CAGR during the forecast period (2019–2025). Market growth is driven by the implementation of combination drugs like various antibacterials or antibacterials coupled with an inhibitor. It is anticipated that the use of combination drugs will reduce the likelihood of developing antibiotic-resistant bacterial strains, which is supposed to boost the market growth.

Compared to the first and second generations, Cephalosporin Drugs of the third generation are more efficient against Gram-negative bacteria. They are also more effective against bacteria that can be resistant to prior Cephalosporin Drugs generations. Cefepime (Maxipime) is the only Cephalosporin Drugs of the fourth generation accessible in the U.S. Although it is efficient against a multitude of Gram-positive and Gram-negative organisms, it is generally reserved for more serious diseases. The fifth-generation Cephalosporin Drugs, ceftaroline (Teflaro) may be used to treat bacteria that are resistant to penicillin antibiotics, including resistant species *Staphylococcus aureus* (MRSA) and *Streptococcus*.

Based on Generation, the market is segmented into First-Generation Cephalosporin, Second-Generation Cephalosporin, Third-Generation Cephalosporin, Fourth-Generation Cephalosporin, and Fifth-Generation Cephalosporin. Based on Application, the market is segmented into Respiratory Tract Infection, Skin Infection, Ear Infection, Sexually Transmitted Infection and Others. Based on Route of Administration, the market is segmented into Injections and Oral Drugs. Based on Type, the market is segmented into Branded and Generic.
