The North America Collision Avoidance System Market would witness market growth of 9.1% CAGR during the forecast period (2017 – 2023). Collision Avoidance System is safety awareness or a warning system and it is designed to reduce the severity of a collision. These systems are majorly incorporated into automobiles and in mining to avoid major accidents. It is also known as pre-crash system, forward collision warning system, or collision mitigating system. The adoption of the technology helps in detecting imminent strikes by alerting the driver about a potential collision. Growing sales of sports, utility, and luxury vehicles would add to the market growth of the anti-collision systems. Leading players in the segment are already integrating basic collision avoidance systems into their mass-market models. Different technology-based collision avoidance systems such as radar, ultrasound, camera, and LiDAR, are technologies that offer active safety and pre-crash mitigation capabilities in motor vehicles. Radars used to pick accurate determination of distance and location of a given obstacle
