Abstracts

The North America Colposcopes Market would witness market growth of 4.9% CAGR during the forecast period (2020-2026).

Colposcopes have a lighting adjustment knob to alter the light level, a fan to cool the lamp bulbs (when utilizing halogen lamps), and a filter system. The bulb should be easily adjustable. Halogen light bulbs are efficient and simple to remove, yet emit heat. Light-emitting diode (LED) lamps last longer and generate no heat.

This device's high installation cost and shortage of professional clinical consumers to use the colposcope could somehow hamper the development of this market. In addition, lack of awareness of cervical cancer in low-economic countries will also restrict the colposcope evolution market over the forecast period. Significant complications while doing colposcopies such as bleeding or infection will also sluggish this market 's growth.

The size of the market for colposcopy is projected to see substantial growth owing to the growing incidences of cervical cancer across the globe. The main use of colposcopy is identifying precancerous tissues to avoid cervical cancer. According to the World Health Organization (WHO), cervical cancer is listed as the world's second-most common cause of death from cancer in women.

The cancer burden is rising among women in both high-income (HIC) and low- and middle-income (LMIC) countries owing to shifts in the prevalence of cancer risk factors

as countries experience economic transformation. The major risk factors include changing patterns of lifestyle, smoking, physical inactivity, excess body weight, and changes in reproductive patterns such as late first birth, as well as fewer births. Therefore, a higher prevalence of cervical cancer due to the above-mentioned factors will drive colposcope market growth worldwide.

Based on Application, the market is segmented into Cervical cancer screening and Physical examinations. Based on Product, the market is segmented into Portable, Handheld and Stationary. Based on countries, the market is segmented into U.S., Mexico, Canada, and Rest of North America.
