Abstracts

The North America Content Services Platforms Market would witness market growth of 17.9% CAGR during the forecast period (2018 – 2024).

An extensive content services platform will provide a single, trusted source that provides integrated record management, smart metadata management, archive and search capabilities, and version control over all business content, whether stored on the platform itself or in other business repositories such as Microsoft® SharePoint®, SAP® apps, Salesforce file technologies or email. For any piece of material, you can generate a single source of reality and guarantee that all content activity complies with internal information management measures and processes as well as external laws and government mandates.

North America is estimated to account for the biggest market share in 2018. The region includes developed nations such as the US and Canada and is regarded to be the most advanced area embracing fresh and evolving techniques. In addition, the North American region has a broad existence of important industry players providing web services platform software and services, and their economic situation allows them to invest heavily in major instruments and techniques for efficient company operations.

Based on Component, the market is segmented into Solutions and Services. Solutions is further segmented into Document & Records Management, Workflow Management & Case Management, Information Security & Governance, Data Capture, Content Reporting & Analytics, and Others. Services is further segmented into Integration & Deployment, Advisory & Consulting, and Support & Maintenance. Based on Organization Size, the market is segmented into Large Enterprises and Small & Medium-Sized Enterprises. Based on Deployment mode, the market is segmented into Cloud
