## **Abstracts**

The North America Continuous Glucose Monitoring Device Market would witness market growth of 11.6% CAGR during the forecast period (2020-2026).

Continuous glucose monitors (CGMs) contain subcutaneous sensors that track interstitial glucose levels every 1-5 minutes, offering alerts when glucose levels are too high or too low, or increase or fall rapidly. CGMs transmit to a receiver which is either a pager-like device or an insulin pump integral to it. Looking at the continuous glucose graph and the alarm response can help patients avoid severe hyperglycemia or hypoglycemia.

These systems, unlike conventional glucose monitors, allow for periodic monitoring of glucose levels, which is critically important for avoiding diabetic complications. In fact, GCMS research has set out a blueprint for the artificial/bionic pancreas that is much awaited, high-tech, closed-loop. Thus, the development of novel and technologically advanced CGMS is the primary focus of the manufacturing companies that monitor glucose devices. It offers a broad range of applications for all age cohorts, healthcare settings, and geographies. Thus, the market for continuous glucose monitoring devices provides lucrative opportunities for producers of CGMS and manufacturers of insulin pumps.

Several governments across the globe are introducing various diabetes treatment measures, allowing continuous glucose monitoring devices to be more widely adopted. Diabetes challenges the US population's health in many ways. The high prevalence and cost of diabetes are two reasons that have enforced the US government to control diabetes more effectively. In order to better control diabetes, the government is

implementing a variety of actions addressing lifestyle and socioeconomic factors, screening and medical management, and public awareness campaigns. Based on Component, the market is segmented into Sensors, Transmitters, and Receivers. Based on End User, the market is segmented into Hospitals, Homecare Settings and Other End Users. Based on countries, the market is segmented into U.S., Mexico, Canada, and Rest of North America.
