The North America Electric Vehicle Market would witness market growth of 23.8% CAGR during the forecast period (2019–2025).

The increasing prices of conventional fuel and its disappearing presence encourage the search for low-cost options. In order to reduce their fuel spending, customer demand for electric vehicles is growing due to their affordable prices, which are likely to boost the development of the worldwide electric fuel market. In addition, factors such as rising environmental concerns, combined with growing public efforts to protect the environment, are boosting the growth of the global electric vehicle market.

Canadian investment in EVs soared over the last few years. More than 40 models of EVs are now available in Canada, a number that is rapidly ticking upward. Mexico's climate legislation targets emissions cuts of 50% by 2050 (from 2000 levels) and 35% renewable energy by 2024. MexicoCity's overall goal is to reduce emissions by up to 30% (8 to 10 million tonnes of CO₂) from business as usual over the forecast period. Players across the region are competing to enhance their ability to deliver new and advanced products in the market.
