## Abstracts

The North America Facial Fat Transfer Market would witness market growth of 9.7% CAGR during the forecast period (2019-2025).

The North America region accounted for the largest share in the global market for facial fat transfer, due to the growing demand for beauty treatments and the existence of significant players in the region. Non-invasive fat reduction and skin tightening have gained immense popularity among patients. For example, as per the American Society of Plastic Surgeons, injection-based treatments targeting fat pockets in specific areas, such as under the skin, increased by 18% in 2017. In addition, there is an accelerated demand for facial fat transfers in the Americas. Henceforth, the extensive success rate of facial fat grafting procedures is anticipated to fuel the market growth in the region.

Fat transfer provides a natural way to add volume to different areas of the body and enhance the contour. Plastic surgeons expect fat grafting to continue its upward trajectory in the years to come. It includes removing fat from one part of your body and shifting it to another area that needs to be improved. Fat transfer in NYC is used in both cosmetic and reconstructive processes. Fat transfer buttock augmentation is performed by highly-trained plastic surgeons. This makes it an ideal option for women who are looking for minor to moderate improvement in buttock size.
