Abstracts

The North America Inflation Devices Market would witness market growth of 3.3% CAGR during the forecast period (2019-2025).

Physicians use medical imaging in interventional radiology (also called IR) to direct minimally invasive surgical procedures that diagnose, treat, and cure many forms of conditions. Modalities used for imaging include fluoroscopy, MRI, CT, and ultrasound. Interventional radiology makes use of novel technologies like inflation devices to effectively carry out minimally-invasive diagnostic and treatment procedures.

Interventional radiology is sometimes used to insert catheters of the central venous and subcutaneous channels, with some evidence of gain over surgical placement. Arterial embolization procedures are used to treat certain cases of hemorrhage and serious postpartum hemorrhage is highly successful. Vascular procedures such as endovascular varicosity diagnosis, acute limb ischemia, and pulmonary embolism are preferable to surgical techniques. Furthermore, inflation devices are gaining widespread adoption in this field.

Peripheral vascular surgery is peripheral artery disease (PAD) surgical procedure. In PAD, the blood vessels that lead to the arms and legs are narrowed or clogged, and it is hard for blood to get through. Blood carries oxygen which is important to the proper functioning of all human body tissues. If PAD reduces blood flow to arms or legs the patient often feels movement pain and difficulty. Reduced blood flow to the limbs often raises the risk of death of the tissue which can require amputation.

Based on Application, the market is segmented into Interventional Cardiology & Radiology, Urological Procedures, Peripheral Vascular Procedures and Gastroenterological Procedures. Based on Display Type, the market is segmented into Analogue Inflation Devices and Digital Inflation Devices. Based on End User, the market is segmented into Hospitals & Clinics and Ambulatory Surgical Centers. Based on countries, the market is segmented into U.S., Mexico, Canada, and Rest of North America.
