Abstracts

The North America Liquid Detergent Market would witness market growth of 4.6% CAGR during the forecast period (2019 – 2025).

Liquid detergents are chemically different from soaps that can emulsify oil and also act as a wetting agent. They are manufactured from soap, zeolites, bleach, complexion agents, and other enzymes. Liquid detergent is a mixture of chemical compounds that include alkyl benzene sulfonates. The concept of liquid detergent was introduced after powder detergents and bars/soaps gained popularity. However, the adoption of liquid detergent has gained substantial market share comparatively. North America is expected to lead in terms of liquid detergent market share during the forecast period. Major vendors are adopting growth through acquisition strategy to increase their market presence. For instance, in September 2016, Henkel acquired Sun Products Corporation to expand its detergents product portfolio including laundry detergent, fabric softeners, stain removers, and dish detergents to expand its business in North America.

Based on the Nature, the market is segmented into Organic and Conventional. Based on Application, the market is segmented into Laundry and Dish Washing.
