Abstracts

The North America Nephrostomy Devices Market would witness market growth of 7.5% CAGR during the forecast period (2019-2025). Due to favorable reimbursement policies, increased product awareness, the accessibility of highly skilled physicians and the involvement of well-established healthcare facilities in the region, it is expected to see significant growth in the future as well. Also, it is expected that the rapid adoption of technologically advanced medical products will drive the region's market. Increasing government funding for R&D activities in surgical devices as well as procedures also have a positive impact on regional market growth.

Over the past few years, percutaneous nephrostomy (PCN) processes have become immensely popular as they eliminate the need for nephrostomy tube or ureteral stent devices. The PCN procedure delivers various benefits, including minimal blood loss; low treatment costs, and prevents leakage of urine. These processes minimize stay in the hospital, create smaller incisions, and guarantee a quicker recovery. As a result, the increasing popularity of percutaneous nephrostomy (PCN) processes during the forecast period will boost the demand for nephrostomy machines.

Based on Product, the market is segmented into Guidewires, Sheath Dilators, Nephrostomy Catheters, Drainage Tubes and Other Nephrostomy Devices. Based on End Use, the market is segmented into Hospital, Ambulatory Surgical Centers (ASCs) and Emergency Clinics.
