Abstracts

The North America Network Security Firewall Market would witness market growth of 10.8% CAGR during the forecast period (2018 – 2024).

North America is projected to hold the maximum market size in the network security firewall market over the forecast period, due to the novel US telecom regulatory body Federal Communications Commission (FCC). In comparison to old administration, they are fewer firms in comparison to old administration, by rolling back various stringent regulations of the previous regime. They provided advantages to most of the telecom operators to choose and implement new services and solution. As stated by NASDAQ, the 4G LTE wireless penetration exists currently in a ratio of 83% across North America. This can majorly be attributed to most carriers' intention to upgrade to 5G wireless network standard which needs massive investment.
