Abstracts

The North America Oculoplastic Surgery Market would witness market growth of 5.25% CAGR during the forecast period (2019-2025).

Oculoplastic surgery is generally performed to enhance the appearance of patients. Factors such as advances in non-invasive techniques due to benefits, including rapid recovery time and the same-day procedure, are expected to boost the market for oculoplastic surgery. Such techniques are known to dramatically reduce the incidence of postoperative complications that are supposed to work out well for overall market growth in the near future.

Growing prevalence of eye-related disorders, such as blurred vision, eye wrinkles, and droopy eyes, is anticipated to contribute to market growth. According to the American Society of Esthetic Plastic Surgery, more than 1.3 million eyelid operations were conducted worldwide in 2017. The study also points out that nearly 17 million plastic surgery procedures were conducted in the United States alone in the same year. Growing medical tourism and strengthened reimbursement policies in both developed and developing economies are projected to have a positive impact on the development of the oculoplastic surgery industry in the coming years.

Based on Procedure, the market is segmented into Eyelid Surgery, Orbital Surgery, Face Lift, Brow Lift & Forehead Lift and Pediatric Oculoplastic surgery. Based on End Use, the market is segmented into Ambulatory surgical centers and Hospitals & clinics. Based on countries, the market is segmented into U.S., Mexico, Canada, and Rest of North America.
