## Abstracts

The North America Power over Ethernet Chipsets Market would witness market growth of 9.6% CAGR during the forecast period (2018 – 2024). The market is expected to witness significant growth during the forecast period, and it is due to growing use of Internet Protocol (IP) technologies and rapidly growing trend of transmitting data and power via a single cable to distant areas, using PoE switches and PoE injectors. Use of PoE with LED lighting supports various applications of the Internet of Things (IoT) and smart buildings. PoE LED lighting is relatively a new technology; therefore, the adoption of the same in the commercial setup is very limited. Nonetheless, with competitive cost propositions over other lighting technologies, the PoE lighting would witness rapid market adoption, and as a result, driving the growth of the market.
