Abstracts

The North America Remote Infrastructure Management Market would witness a market growth of 10% CAGR during the forecast period. The practice of remote infrastructure management (RIM) has started to become a lot more prevalent for corporations of most sizes in a wide variety of industrial sectors. This increase in popularity is due to the way in which RIM can add value to IT systems, as well as lower costs, maximizing efficiencies and enhancing service availability. In general, it consists of remote monitoring, network monitoring and management, security services, database administration, desktop and server administration. Remote Infrastructure Management (RIM) is the means of taking care of the IT infrastructure of a corporation completely or in parts from a remote location.

Based on Core Services, the market report segments the market into Server Management, Database Management, Storage Management, Network & Communication Management, Application Management, and Others.
