Abstracts

The North America Shoulder Arthroplasty Market would witness market growth of 6.5% CAGR during the forecast period (2018 – 2024).

North America is the region with significant opportunities with respect to implant types. The anatomical shoulder prosthesis segment would be the dominant segment in North American shoulder replacement market. Moreover, significant adoption of reverse shoulder arthroplasty by surgeons and growing sports-related injuries have further contributed to the growth of the market. Nevertheless, postoperative complications associated with shoulder arthroplasties and the cost associated with the shoulder arthroplasty devices is the factors that would limit the growth of the market. The shoulder arthroplasty market is segmented based on procedures, devices, indications, end users, and regions.

Based on Device, the market is segmented into Shoulder Arthroplasty Resurfacing Implants, Shoulder Arthroplasty Trauma Devices, and Shoulder Arthroplasty Platform Systems. Based on Procedure, the market is segmented into Partial Shoulder Arthroplasty, Total Shoulder Arthroplasty, and Revision Shoulder Arthroplasty. Based on Indication, the market is segmented into Fracture/Dislocation, Arthritis, Rotator Cuff Tear Arthropathy, Hill Sachs Defect, and Other Indication. Based on End User, the market is segmented into Hospitals & Clinics, and Outpatient Surgical Centers. Based on countries, the market is segmented into U.S., Mexico, Canada, and Rest of North America.
