Abstracts

The North America SSL VPN Market would witness market growth of 6.2% CAGR during the forecast period (2017 – 2023). SSL VPN is a superior technology when compared to the existing VPN technologies. The SSL VPN uses SSL protocol and Transport Layer Security features to provide secure connectivity between remote users and internal network resources. The SSL/TLS functions are pre-programmed in the modern web browsers. The users are not expected to install client software in order to use SSL VPN. Therefore, SSL VPN is also known as “clientless VPN” or “Web VPN”. The North American region was the highest revenue generating region in 2016, due to rapid adoption of advanced technologies in the region. Growing number of enterprises and rapid growth in the internet users base has supplemented the market growth.

Based on Types, the market report segments the market into Software and Services. Based on Remote Access Modes, the North America SSL VPN Market is segmented into Tunnel Mode, Thin Client Mode, and Clientless Mode. Based on Organization Sizes, the North America SSL VPN Market is segmented into Small & Medium Enterprises and Large Enterprises. Based on Countries, the market report segments the market into US, Mexico, Canada, and Rest of North America.

The market research report covers the analysis of key stake holders of the North America SSL VPN Market.
