Abstracts

Sterilization Technologies are the processes used to reduce the growth of all viable life forms such as bacteria, viruses, fungi, and spore forms from the surfaces of equipment, pharmaceuticals, medications, food ingredients, and biological culture medium. Sterilization Technologies are widely used in the medical centers, life sciences, food processing, pharmaceutical, agriculture and cosmetics. Majority of the products in the healthcare facilities and medical device industry are terminally sterilized. There are many types of sterilization methods such as Steam Sterilization, Ethylene Oxide, Depyrogenation/Dry heat, chemical sterilization, radiation and sterile filtration.

While receiving medical treatment in a healthcare facility, patients can be infected by infections present in a hospital. The most common causes for HAI are the urinary tract infections, respiratory pneumonia, surgical site wound infections and skin infections. According to the report published by Centre for Disease Control and Prevention (CDC) in 2016, "about one in 25 hospital has at least one healthcare acquired infection. It also states that in U.S every year around 648,000 people develop infections and around 75,000 people die during hospital stay".

Based on the Method, the Sterilization Technologies market is segmented into Chemical & Gas Sterilization, Filtration Sterilization, Ionizing Radiation Sterilization and Thermal Sterilization. The Chemical & Gas Sterilization market is segmented into Ethylene oxide, Formaldehyde and Others. Filtration Sterilization is further segmented Liquid and Air & Gas. The Ionizing Radiation Sterilization is further categorized into Gamma Radiation, Electron beam Radiation and Others. The Thermal Sterilization is further sub divided into Autoclaving, Distillation, Pasteurization, Retorting and Others. The Applications highlighted in this report include Pharmaceuticals, Medical Devices, Food & Beverage, Agriculture, Cosmetic, Manufacturing and Others.

Based on Country, North America Sterilization Technologies market is segmented into US, Canada, Mexico and Rest of North America. US remained the dominant Country in the North America Sterilization Technologies market in 2015. Canada would witness promising CAGR during the forecast period (2016-2022).

The report covers the analysis of key stake holders of the Sterilization Technologies market. Key companies profiled in the report include 3M Company, Steris Plc, Getinge Group, Cantel Medical Corporation, Tso3, Nordian Inc., Atec Pharmatechnik GmbH and Noxilizer Inc.
