## Abstracts

The North America Tea Tree Oil Market would witness market growth of 6.04% CAGR during the forecast period (2019–2025).

The tea tree oil contains several monoterpenes (80%–90%) and the most abundant of these is terpinen-4-ol, which makes up to at least 30% and has an important role in the antimicrobial activity of the essential oils. Packed with the power of antibacterial and antifungal compounds, tea tree oil helps in the reduction of inflammation, making it effective for cases of mild to moderate acne. Studies revealed that it can control acne by penetrating the skin and clearing clogged sebaceous glands. It will help in drying out the whiteheads, blackheads, pimples and other blemishes, and in disinfecting the pores too.

Increasing demand for natural and organic products for various purposes in the healthcare and cosmetics industry worldwide is expected to remain the dominant force driving the need for tea tree oil market. Furthermore, increasing demand for tea tree oil in the personal care industry is also projected to influence the tea tree oil market significantly.
