The North America Water soluble polymer Market would witness market growth of 6.5% CAGR during the forecast period (2019-2025).

Wide implementation for drug delivery, contact lenses, artificial organ development, and tissue engineering in the medical industry is a significant driving factor for the water-soluble polymers market. Constant study on polymers and their evolving characteristic after contact with water solution are carried out in response to the need to develop more ecological products and meet the requirements of the manufacturing industry, resulting in advanced innovation that can potentially stimulate market growth.

Water-soluble polymers like polyamines, resin amines, polyacrylamides, flocculants, and several others are being used as water treatment chemicals in huge reservoirs, swimming pools, as well as in tanks. Because of the efficient pH range of these water-soluble polymers, they help in enhancing the performance of the treated water. Factors like accelerating urbanization, rising population, and economic growth are increasing the adoption of water soluble polymers for water therapy.
