Abstracts

Asia Pacific (APAC) Material Handling Market is estimated to grow from US\$47.290 billion in 2015 to US\$63.502 billion by 2021, at a CAGR of 5.04% over the forecast period. The region will witness the fastest growth out of different geographical regions, especially on account of rising demand for these solutions from China and India, over the forecast period. Rising infrastructure and construction activity in emerging economies will boost the demand for automated material handling (AMH) systems, cranes and hoists, thereby propelling the market growth. Growing e-commerce industry will create significant opportunities for material handling manufacturers to expand their presence in the region over the forecast period. Moreover, growing workers' safety concerns will fuel the use of AMH systems in dangerous and hazardous locations augmenting the demand for these solutions.

First section of the report deals with detailed research methodology for calculating market size and forecasts, secondary data sources used and the primary inputs which were taken for data validation. This section also outlines various segmentations which have been covered as part of the report.
