Abstracts

The Asia Pacific material handling market is expected to achieve a market size of USD71.608 billion in 2024 from a market size of USD55.396 billion in 2018. The Asia Pacific region is poised to witness the fastest growth out of different geographical regions, on the account of rising demand for material handling solutions from emerging economies of China and India, over the forecast period. Growing infrastructure and construction activity in emerging economies will propagate the demand for automated material handling (AMH) systems, cranes and hoists, hence, fueling the market growth. The growing e-commerce industry will further create significant opportunities for material handling manufacturers in order to expand their presence in the region during the forecast period and in the upcoming years. In addition, the growing logistics industry is further propelling market growth in the forecast period. Moreover, growing concerns regarding workers' safety will fuel the utilization of automated material handling systems while working in dangerous and hazardous locations augmenting the market demand for these solutions.
