## Abstracts

Australia probiotics market is estimated to be valued at US\$317.395 million in 2019 and is projected to grow further in the years to come. Growing awareness regarding the relationship between diet and health is augmenting the demand for probiotic food and beverage products and dietary supplements that enhance health while providing basic nutrition. Changing food pattern consumption coupled with the increasing number of people from these diseases is leading to the growing adoption of probiotics in daily diet. The growing awareness of personal health deterioration coupled with increasing incidences of self-medication is expected to boost the market of probiotics in the forecast period. The increasing consumption of meat and other livestock products is boosting the growth of the market as the probiotics in the animal husbandry industry ensure the proper health of animals to eliminate the constant threat of disease outbreaks.
