Abstracts

The biodegradable paper packaging market was valued at US\$215.039 billion in 2017 and is projected to expand at a CAGR of 5.90% over the forecast period to reach US\$303.315 billion by 2023. The growing problem of landfills and non-biodegradability or very slow biodegradability of plastic based packaging has led to the increased adoption of biodegradable paper. Moreover, the rising consumer consciousness and government regulations supporting the adoption of biodegradable packaging has supplemented the growth of the market.

Research Methodology

The report provides a brief introduction of the market and deals with detailed research methodology for calculating market size and forecasts, secondary data sources used and the primary inputs which were taken for data validation. This section also outlines various segments which have been covered as part of the report.
